PROFESSIONAL SUMMARY

- 1+ year of experience as a Frontend Developer at Frontend Simplified, a project-based software engineering training company, with hands-on experience in React, Next.js, TypeScript, Figma, Firebase, Stripe, and Tailwind CSS.
- Built 20+ responsive web applications across AI, e-commerce, and fintech, all deployed live on Vercel, by completing three frontend internship cycles in React, Next.js, TypeScript, and Tailwind CSS.
- Shipped Skinstric AI, a startup-partnered skincare analysis app, in 2 weeks, by independently building a multi-step image-upload and assessment flow in React, CSS, and Figma.

PROFESSIONAL EXPERIENCE

Frontend Simplified

Frontend Developer Intern

Dec 2024 - Present

Remote

Project-based software engineering training program with structured internship cycles, capstone projects, and guided technical instruction.

- Built 25+ reusable React, TypeScript, and Next.js UI components spanning the project portfolio, leading to 30% faster build-out of new pages, by standardizing component structure and integrating REST APIs in HTML5, CSS, and JavaScript.
- Implemented 5+ e-commerce features including product sorting, cart, Stripe checkout, and responsive layouts, leading to smoother discovery and checkout, by managing state with Redux and React Hooks (useState, useEffect).
- Integrated Firebase authentication and Stripe payment workflows, resulting in 90% of test checkouts completing successfully, by building secure sign-up and subscription flows and managing version control in Git, GitHub, and GitHub Copilot.

Skinstric

Frontend Developer

Dec 2025 - Jan 2026

Remote

B2B/B2C AI SaaS Series-A stage startup focused on skincare and face-analysis technology.

- Built a multi-step skincare-analysis web app with image-upload and camera-scan flows in 2 weeks, reaching a Lighthouse performance score of 99/100, by independently choosing the stack and building the UI in React, CSS, and Figma.
- Designed a 3-step assessment flow for onboarding, image submission, and results, leading to 100% of test users completing the full analysis, by building the guided UI from real startup product requirements.

TECHNICAL PROJECTS

Summarist - B2C education and reading SaaS-style platform with audio book summaries and content discovery |
advanced-internship-black.vercel.app

Next.js, Redux, Firebase, Stripe, CSS

- Built a book-summary and audio platform with guest and registered-user authentication, driving 100% of test users completing sign-up, by implementing Firebase login and sign-up with Redux state management.
- Integrated Stripe payments with webhook functionality, resulting in 90% of test payments processing successfully, by building payment-driven access logic.

E-Commerce Storefront - B2C shopping platform with product discovery and item selection |
ecommerce-stripe-rfot.vercel.app

Next.js, TypeScript, Tailwind CSS, Stripe

- Developed a modern e-commerce storefront with responsive home and product pages, reaching a Lighthouse performance score of 97/100, by structuring product presentation and navigation in Next.js and Tailwind CSS.
- Integrated Stripe checkout in a test environment, resulting in 100% of test payments completing end-to-end, by wiring TypeScript-based routing and product-driven UI.

Agency AI - B2B AI consulting and services website designed to present service offerings |
agency-ai-black.vercel.app

React, Vite, TypeScript, Framer Motion, Web3Forms

- Engineered a responsive agency web app with light/dark mode and animated page elements, reaching a Lighthouse accessibility score of 86/100, by implementing dynamic cursor effects and transitions with Framer Motion.
- Integrated the Web3Forms API into the contact form, delivering 5+ test inquiries successfully, by handling form state in React and Vite.

TECHNICAL SKILLS & RELEVANT CERTIFICATIONS

Methodologies: Responsive Web Design, Component-Based Development, REST API Integration, State Management, Authentication Workflows, Payment Integration, Version Control, UI Implementation

Tools: React, Next.js, Vite, Redux, Tailwind CSS, Firebase, Stripe, Web3Forms, Framer Motion, Git, GitHub, GitHub Copilot, Figma, Vercel

Programming Languages: JavaScript, TypeScript, HTML5, CSS

Relevant Certifications: Frontend Simplified Software Engineering Program (FES Certificate)
